Ehealth European Regions Forum.

ANNEX:

POSSIBLE QUESTIONS/TOPICS TO BE ADDRESSED

Speakers are kindly asked to identify two questions (in order of priority) which they would like to answer to among the ones here below. They can also propose one additional question they would like to be asked.

Group 1

Do you think it is possible to combine decentralisation with closer European cooperation in eHealth?

Group 2

The overall topic of the session today is innovation. How do you combine in your region the importance of promoting innovation in health, the challenging economic situation and the obligation to provide high quality accessible services to citizens?

Group 3

Did you measure costs savings and/or increase productivity with eHealth?
Can you give us concrete example of achieved or expected figures?

Backup questions

In your experience is there a “European Patient” and how are you coping in your region to address his/her needs?

What are the concrete and measurable benefits to patients and healthcare system, in your region/country in relation to telemedicine?
